Stage 3 Enrichment Programme

Programmes in Science, Mathematics & Visual Arts

Learning ~ Living ~ Leading

Academic Enrichment Programme Classes for Stage 3

Science

The programme provides the opportunity to access a broad range of learning experiences in the area of Science normally only available to students in a secondary school.

Students selected will have demonstrated a high level of conceptual thinking and scientific knowledge.

The programme will be lead by the senior Science staff, take place in the Laboratory and will provide a genuine broad and enriching experience of learning in the area of Science.

“A **love** of learning ...”

Mathematics

Mathematics students in Stage 3 who have displayed significant talent in the area of Mathematics will have the opportunity to participate in an enrichment programme developed and lead by the Secondary Mathematics Team.

The enrichment programme will build on and enhance the students already well developed mathematical reasoning and problem solving, as well as introduce them to new and more challenging concepts.

“An **opportunity** to
be challenged ...”

Visual Arts

This programme has been designed for those students in Stage 3 that have displayed talent and passion in an area of the Visual Arts. This programme provides them with the opportunity to explore and practice specialised techniques with access to the tuition and direction of Andrew Bardsley the secondary Visual Arts teacher.

The programme will allow students to work creatively with a broad range of mediums and resources.

“**Creativity** explored ...”

The EAC Enrichment Programme

In 2008 Emmanuel Anglican College established a number of initiatives to develop and enrich those students who have displayed significant potential and talent in a particular area of the curriculum.

These programmes are delivered by teachers from the Secondary School and provide students with access to specialist teachers and resources not readily available in most Primary schools.

Students undertaking these programmes have the opportunity to study, explore and practice concepts, theories and skills which will enrich and extend them in the areas of learning where they have displayed potential or talent.

Mr Robert Tobias, Deputy Principal Secondary coordinates the enrichment programme in consultation with both Primary and Secondary teaching teams to ensure the very best resources and content are developed.

Please contact Robert Tobias on 6681 5054 for any enquiries or further information about the programme.

“This is an excellent opportunity for our primary students and a great way for them to stretch their abilities with the support and encouragement of specialist secondary teachers.”

Anne Noble—Deputy Principal Primary

Learning, Living, Leading

Emmanuel Anglican College caters to students from Pre-Kindy to Year 12. We work in partnership with families to develop confident, well rounded, caring and committed young people who are equipped to meet the challenges of life.

This is achieved by providing students with as many learning opportunities as possible and the support necessary for each student to try new things, set and reach goals and enjoy their successes.

We have built a strong reputation for quality education. Above all else, we are a community focussed on the health and well-being of our children.
